2. Public comment
3. Review economic development draft

Discussion on the economic development plan, The Board has reviewed the economic development Draft from Peter Fairweather. The Idea of improving village zoning to allow for more flexibility, the current village zoning does not reflect the character of the existing structures. Karen will get copies of the Hyde park zoning which was recommended as a possible model and check with regional planning for zoning in other village centers that maybe more applicable. Current zoning requirements for the village do not match the built construction and the development of new projects would not follow the more traditional layout. Allowances for housing should also be considered where existing services are provided.
