

# PFAS Data

11/12/2019

ND = Non-detect, result was below the level that can be confidently reported by the analytic laboratory.

Interim drinking water standard is the 5 PFAS compounds currently regulated in Vermont. These compounds are identified in red and with an asterisk below.

Results are sorted with samples with the highest PFAS concentration at the top.

WSID	System	Town	Lab Number	Date	Type	Sample Point	Facility ID	Compound	Concentration (ppt)
