

SELECTBOARD MEETING AGENDA
TUESDAY, JULY 21, 2020 at site visit Cabot Creamery 5:15 P.M.

Those in attendance: Fred Ducharme, Matt Nally, Ruth Goodrich, Mike Hogan, Aaron Page from Cabot Creamery

- Aaron reviewed the original proposal to install a utility pole near the sidewalk by the driveway that runs into the Willey Building parking lot. This was to run a line up Whittier Hill to get 3 phase power to a Digester to be built by the creamery at a future date.
- The Board restated their concerns from a previous meeting about this location and felt that safety issues, problems plowing in the winter, and other factors make it a bad option.
- There were other suggestions, but the one that was less disruptive to the infrastructure of the driveway, sidewalks, and other utility poles was to run the line underground. We looked at some paths that were least invasive and agreed in principal 4-0 that this was the best direction.
- Aaron will get back to Selectboard with more information and any further questions.
- Meeting concluded at 5:50 pm

Mike Hogan
Selectboard Clerk
